Lifia Academy goes Live today!

EAST LANSING, MI, (November 19, 2019) – A.J. Boggs & Company has released Lifia Academy, an exciting user-friendly online education and training platform for Health Care Administrators, Social Workers, and Agency staff specifically for the Ryan White Program community. The platform currently focuses on CAREWare 6 training, with more online education planned for future releases.

The Ryan White HIV/AIDS Program provides a comprehensive system of care, including primary medical care and essential support services for people living with HIV (PLWH) who are uninsured or underinsured. The Program works with cities, states, and local community-based organizations to treat more than half a million people each year. The Program reaches approximately 52% of all people diagnosed with HIV in the United States.

Lifia Academy provides a most wanted online education platform with an easy, rapid and enjoyable user experience in the space. Users will have immediate access to materials, specialists and forums that would guarantee each question and concern is properly addressed.

Lifia academy will host courses and offer certification on various levels of CAREWare (an electronic health and social support services information system for Ryan White HIV/AIDS Programs), data management, and user security best practices.
